EDUCATION

Amity University — Noida, UP
Bachelor of Technology Computer Science - CGPA 7.33 — *Aug. 2020 – May 2024*

St. Columbus School — Faridabad, Haryana
Science (Non Medical) - Percentage 80% — *Apr. 2018 – Mar. 2020*

EXPERIENCE

Inxee System Private Limited (On-site) — Gurugram, Haryana
Web Service Development Intern — *May 2023 – Jun. 2023*

- Developed a user-friendly and scalable Inventory Management System within a 4-5 week summer industry project.
- Collaborated with a team to understand project requirements, implement features, and deliver a project.
- Exceptional project management and technical skills led to the successful completion of the Project.
- Gained valuable practical experience in software development by working on a live industry project.

VOLUNTEER EXPERIENCE

Speak-Up World Foundation(On-site) — Sangam Vihar, Delhi
Non-Governmental Organization Intern — *Feb. 2023*

- Assisted underprivileged individuals by educating them about government schemes, financial strategies, and opportunities to improve their livelihoods.
- Conducted outreach programs to advocate for the rights and welfare of marginalized groups, empowering them to access available resources.
- Organized and led donation drives, distributing food items and sanitary pads to marginalized groups, while also extending compassion to street dogs through feeding and care.

PROJECTS

Inventory Management System | *PHP, HTML, CSS, JavaScript, MySQL, BootStrap* — May 2023 – Jun. 2023

- Successfully developed a comprehensive Inventory Management System using cutting-edge technologies.
- The tasks involved creating a secure login page with a login button for user access. User registration functionality allowed new users to sign up, entering their details. A logout page was implemented to handle user logouts, and a user profile page allowed users to view and manage their account information.

E-Commerce Website | *Fruit Bazaar* — Mar. 2023 – Apr. 2023

- Basic E-commerce Functionalities: Users can browse, view, and purchase various fruits from the online store.
- MySQL Database: The project uses the MySQL extension to interact with the database for product management and user-related operations.
- User Registration and Login: Users can register, log in, and access personalized features like saved carts and order history.
- Admin Panel: Authorized administrators can manage products, update prices, add new fruits, and view order.

Ticket Booking App | *Flutter-Dart* — Dec. 2022 – Jan. 2023

- Developed Flutter ticket booking app with intuitive UI.
- Integrated secure payment and real-time seat availability.
- Implemented user authentication and push notifications.
